A Medical Crib Sheet for Homicide Investigators and Prosecutors
Cindy Christian, MD, Anthony A. Latini Endowed Chair in Child Abuse and Neglect Prevention at the Children’s Hospital of Philadelphia, Professor of Pediatrics at the University of Pennsylvania Perelman School of Medicine
Vincent J. Palusci, MD, MS, FAAP, Professor of Pediatrics at New York University School of Medicine
This course will provide an explanation of basic medical terminology commonly associated with serious physical injury and death in babies and toddlers. Attendees will be provided with a BaT Investigations Crib Sheet®. Attendees will learn about the significance of the presence or absence of findings in these complex medical diagnoses and how those findings may affect the investigative timeline.

Baby and Toddler Trauma Investigations: Getting it Right from the Start
Leigh Bishop, Esq. Babies and Toddlers, Inc. Detective
David Rein, Queens North Homicide, New York Police Department
This course will outline important investigative steps for law enforcement and prosecutors involved in complex medical cases of babies and toddlers injury and/or death. Attendees will receive a BaT Infant Health Questionnaire Form®. Attendees will learn about the importance of an immediate and thorough law enforcement investigation that must be coordinated with a thorough medical investigation in order to reach the appropriate outcome.
